### The Newest Limited Editions of Bialetti Mokona Will Make Christmas Even more Glamorous

For a Christmas featuring exclusive design and good coffee, **Bialetti** presents its electric espresso maker, Mokona, in three new limited edition versions: **Mokona Blue**, **Mokona Black** and **Mokona White**, and these last two also feature a special version with Swarovski crystals. The novelties don't stop with the aesthetic elements, however, because the three limited editions prepare an even more intense and creamy coffee, thanks to the new pump that is able to create a pressure of **20 bar** instead of 15 bar.

**Mokona Blue** is a metallic colour, which makes the Mokona even more gritty and captivating.

**Mokona White and Mokona Black**, instead, have been designed for anyone who wants to add a touch of glamour to their furnishings: in fact, these two coffee makers, which have been created in two timeless fashion colours, are embellished by a line of **Swarovski** crystals, which, like a choker necklace, encircle the body of the coffee maker, making it even more refined. Moreover, the handle of the steam valve is made from a special material called *Soft Touch* to guarantee increased pleasure to the touch and safety when handling.

Present in all three versions, the **new 20 bar pump** ensures increased pressure and increased power, the result being an even more intense coffee. This innovative feature adds to the versatility of **Mokona**, **the only electric espresso maker that can be used in three different ways**: with the classic ground coffee blend, with convenient pods, or with the exclusive **Bialetti** capsules, in the "Intense", "Arabic" and "Deka" versions, which ensure that your coffee will always be perfect.

With their versatility and elegance, the new versions of **Mokona** are the perfect gifts for anyone who desires the best in an electric espresso maker, for both function and unique design.
